EDUCATION

B.A Hons (English)
Govt. Titumir College
2022 - Now
Mohakhali, Dhaka

SKILLS

React JS/Next JS
React Query/SWR
Redux-Toolkit/Zustand
Tailwind CSS/Bootstrap
TypeScript/JavaScript
API Integration

BASIC IN

Node JS/Express JS
PHP/Laravel
Figma software
Backend Architecture
API Building

REACT DEVELOPER

2021 - 2023

Tuition Terminal

During my tenure at Tuition Terminal, I led the React development efforts for tuitionterminal.com.bd. Utilizing ReactJS and Vite for streamlined development, I focused on ensuring the website's responsiveness using Bootstrap for UI design. API integration was handled seamlessly with Axios, while Redux Toolkit facilitated robust state management for the application. The project was deployed on Vercel for scalable and reliable hosting.

FRONT END DEVELOPER

2023 - Now

Porao Technology

At Porao, I served as a front-end developer, building the project entirely from scratch using React. I employed React Query for optimized data fetching and caching, and ensured a responsive design across mobile and larger displays with TailwindCSS. For global state management alongside React Query, Zustand was utilized. The project was developed in TypeScript for robust type checking and scalability.
